Subject: Re: Bolton HS - PCB Remediation Plan - Phase III

---

Ashis-

We've reviewed the Phase III SOW, which was provided as a modification to your Phase II work plan in accordance with condition 17 of the May 2011 Approval.

We have reviewed your modification plan for W1-15 and the soffits and have no further comments on the modification. You may proceed accordingly.

Please be aware that all conditions contained in the May 2011 Approval also apply to this modification. Your PCB completion report should include all abatement activities, including this phase.

Please note that I also provided comments on the proposed soil sampling plan via e-mail today.

Subject: Bolton HS - PCB Remediation Plan - Phase III

---

Hi Kim,

To follow up on my e-mail this morning, I am sending this Self-Implementing Cleanup and Disposal Plan (SIDP) for remediation of PCB-containing interior/exterior window/door and soffit caulk in Area III (Windows W01 through W15)

at Bolton HS. Tomorrow, I will mail the original application with a CD containing all the samples results so as to reach you overnight. As I indicated in my earlier e-mail, this is identical to the SIDP for the last Phase that you have already reviewed and approved without any change in work practices and procedures. Please call me if you have any questions. Thanks.

Ashis
